## EDUCATION

### Bachelor of Science, Computer Science

May 2019

Arizona State University – Ira A. Fulton School of Engineering

Honors: *summa cum laude*

## RELEVANT COURSEWORK

### Cumulative GPA: 3.84

- Principles of Programming with Java
- Object-Oriented Programming and Data Structures
- Logic in Computer Science
- Computer Organization/Assembly Language
- Intro to Programming Languages
- Data Structures and Algorithms
- Introduction to Software Engineering
- Operating Systems
- Principles of Programming Languages
- Intro to Theoretical Computer Science
- Distributed Software Development
- Intro to Human Computer Interaction
- Computer Networks
- Database Management
- Software QA and Testing
- Multimedia Information Systems
- Mobile Development

## EXPERIENCE

### IntraEdge | Software Development Technical Intern

Summer 2017 | Chandler, AZ

- Applied skills learned during the prior summer to develop Solution Briefs, a MEAN stack web application which stores and displays the company's client success stories to engage prospective clients
- Led 2-person team developing Solution Briefs project during transitional period
- Implemented MongoDB database to store success story data separate from the client
- Developed a RESTful API server using NodeJS and Express to allow admins to modify data through the client

Summer 2016 | Chandler, AZ

- Developed HTML/CSS, JavaScript, Angular, and Typescript skills
- Began development of an employee chat mobile application in Ionic
- Used Firebase to handle authentication, employee data storage, and chat functions

## ENGINEERING PROJECTS

### Social Media Article Visualizer

- Worked in a 6-person team to develop a web application for academic research on the relationships and fragmentation between social media-related academic articles
- Developed a solution to provide a visualization of relationships between articles across different fields using an interactive directed graph
- Used D3.js to implement the graph using metadata of 4 million nodes (articles) and their edges (citations)
- Designed a usability-focused UI prototype before finalizing the concept as an Angular web application

### Autonomous Robot Maze Competition (1<sup>st</sup> Place)

- Collaborated in a 4-person team to create an autonomous robot to compete in maze traversal
- Programmed the robot using MATLAB
- Results: produced a robot which traversed the maze the fastest among all groups; the robot was one of the few which successfully completed the maze

## TECHNICAL

- Proficient: Java, C, C++, HTML/CSS, JavaScript, Angular, C#
- Familiar: Python, Swift, SQL, MongoDB, NodeJS, Express, MATLAB, Scheme, Prolog, MIPS32
- REST and SOAP web services
